

FORAGERS FORTUNE

Thank you for buying one of our beautiful beeswax luminaries.

Each luminary has been hand dipped 15- 20 times to build up the optimum thickness of beeswax. This ensures each one is sturdy and elegant whilst allowing the light to shine through for a perfect glow.

In order for you to get the most out of your luminary whilst maintaining safety please follow the instructions below:

Care instructions

Beeswax is a natural product that can be affected by extreme temperatures and should be handled with care. To prevent the wax from softening or melting do not store in direct sunlight or near any type of heat source. If stored in cold conditions the luminary will become brittle and may be easily damaged.

Light instructions

All our luminaries are supplied with your choice of LED light or beeswax nightlight.

We recommend using LED lights if the luminary is in reach of children, animals or in high traffic areas.

If using the luminary with a nightlight the bottom of the luminary needs to be protected from the heat of the candle. In order to do this empty the gravel supplied into the bottom of the luminary ensuring the gravel is level. Place the nightlight in the luminary making sure it is placed centrally. Never light the nightlight unless placed on the gravel or other heat proof material.

Candle Safety

- Warning candles are flammable and should always be burnt on a heat proof surface.
- To prevent fire and serious injury, always burn candles within sight.
- Never leave a burning candle unattended or move whilst lit.
- Keep out of the reach of children and pets.
- Keep away from drafts and vibrations.
- Never place a candle near anything that could catch fire.
- Do not burn candles for more than 4 hours at a time.
